

# Our Small Furry

## Travel Tick List

If you're leaving the house with a small mammal, why not use our 4 point travel ready tick list to maximise your chances of a top trip?

### GET A SUITABLE CARRIER.

Get a properly rated pet carrier and make sure it's big enough for them to move around in, but small enough so they don't get thrown around.

### PLAN AHEAD.

Before you travel, have a think about the trip. Do you have enough food and water? Can you travel at a cooler, quieter time of the day? How will you clean up any mess that your pet makes?

### STICK TOGETHER.

If your pet has a companion, take them both on the journey. They will lend each other support.

### BUSSES, TRAINS AND CARS.

If you're travelling by car, ensure the pet carrier is properly secured in the back. If you're using public transport; check rules of carriage, do a practice run at a quiet time and do try to travel when it's cool.
